DETAILED ACTION

Applicants' amendment and Request for Continuing Examination, filed August 4, 2005, are acknowledged. Claims 15-20, 26-28, and 30-47 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-20, 26, 28, and 39-47, drawn to a polynucleotide encoding a metal ion affinity peptide having the formula (His-Asn)_n, wherein n= 3-10, vector, host cell, and kit, classified in class 536, subclass 23.1.
- II. Claims 30-37, drawn to a polynucleotide encoding a metal ion affinity peptide, as set forth by SEQ ID NO: 1, vector, host cell, and kit, classified in class 536, subclass 23.1.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Also, product and process inventions are distinct if any of the following can be shown: (1) that the process as claimed can be used to make another and materially different product, (2) that the product claimed can be used in a materially different process of using that product, or (3) that the product claimed can be made by another and materially different process (MPEP § 806.05(h)). These inventions are different or distinct for the following reasons.

Inventions I and II are distinct because the products of Inventions I and II are physically and/or functionally distinct chemical entities.

Art Unit: 1656

Because the products of Inventions I and II are physically and/or functionally distinct chemical entities, a search for more than one of Inventions I-II would be a burden on the Office.

These inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter. Furthermore, as explained above, searching more than one invention would be a burden on the Office. Therefore, restriction for examination purposes, as indicated, is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
